As a toy company, we take toy safety issues very seriously. To insure the safety and quality of our products, we submit them to independent product safety laboratories for evaluation and testing. Please find attached test report.

The specific issue concerning lead content is actually not applicable to the foam play mats we produced. Only products with an accessible surface coating may contain excessive lead. For example, products with any type of printing may potentially contain higher lead content. Our foam play mats does not have an accessible surface coating or any printing on its surface. Instead the color of the foam is formed through synthetic coloring that was mixed into the foam. These synthetic coloring was also tested and found to be safe by Bureau Veritas.
